National Equipment Register

Protect your profits
(and your heavy equipment)

Every year, more than a billion dollars worth of heavy equipment is stolen. Heavy equipment registration with the NER is a proven way to deter heavy equipment theft and reduce insurance costs.
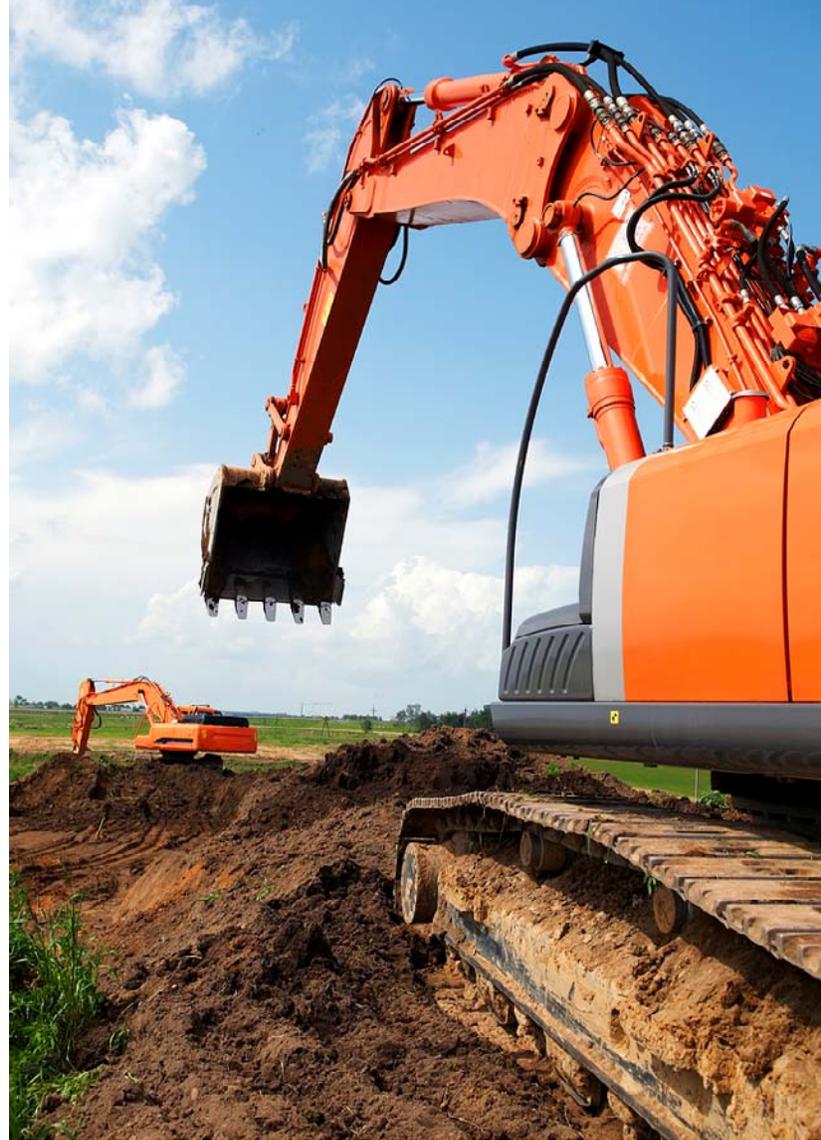

Register your contractor's equipment

Through our specialty carrier's alliance with the NER, insureds will receive preferred pricing on equipment registration on the NER's HELPtech® database. In addition to preferred registration pricing, our specialty carrier will waive its theft deductibles up to $10,000 per occurrence when a theft occurs, if 1) an insured's equipment is registered prior to a theft and 2) the equipment is not recovered within 30 days of it being reported to law enforcement authorities. When insureds register their equipment on HELPtech®, they're playing a large role in the protection of their own investments.

How the NER works

The NER is a national database that helps authorities track down stolen NER-registered equipment. It contains more than 15 million ownership records and approximately 100,000 theft reports. For a small annual fee per item, owners can securely and confidentially register all of their equipment by serial and other tracking numbers.

Visit *www.ner.net* for more information on NER. For details on registering equipment go to *www.stopequipmenttheft.com* and use discount code SI427.

Contact us for fast, competitive quotes and first-rate service.

The NER offers many advantages

Deterrence: Owners receive weather-proof decals warning potential thieves of the heightened risk of detection and arrest.

Theft Reporting: As soon as a theft is detected and the NER is notified, a full report is added to the database, ensuring a speedy and accurate loss report. Law enforcement authorities can access the NER's police hotline 24/7 to check for stolen equipment.

Recovery: NER registration facilitates owner and equipment identification and increases the chances the machine is recovered.

Proof of ownership: Both component and owner-applied numbers may be recorded on the NER's HELPtech database, which helps prove ownership and provides law enforcement with an added identification tool.

Online inventory management: Owners receive secure, password-protected, and searchable access to all of their registered items.
